Present & History

The glassworks

RONA has a strong export position, qualified personnel and the most modern technologies. The glassworks in Lednické Rovne is one of the world leaders in the processing of lead-free beverage glass known as crystalline.

The glassworks is trading with a wide range of customers from all over the world and provides them with activities related to the development, production and servicing of beverage glass for households, hotels and restaurants as well as for the airlines and shipping companies. Machine and handcrafted goblets and beverage glasses are covering the basic position in the company's product range.

96% of production is exported and is available in more than 80 countries worldwide. The yearly production of the company exceeds 60 million pieces.

RONA products and quality rank the glassworks among the world's leading manufacturers of the table top glassware.

History & Tradition

The glassworks was founded in 1892

130 years of tradition

The glassworks was founded in 1892 by the entrepreneur Jozef Schreiber as the last and the largest glassworks of the Viennas company Schreiber und Neffen, which had the most modern technical equipment for its time. The glassworks in Lednické Rovne is the most successful Slovak glassworks in history.

History timeline

1892

The glassworks starts with the production of flat glass and tableware pressed glass, but mainly focused on the production of drinking glasses and sets for wholesale customers under the brand name Rona Crystal.

1896

The first glasses decorated at that time by one of the most modern facilities, namely a pantograph purchased in England (the first English pantographs on the European continent).

1906

The glassworks was the first company to introduce pressed drinking glass, sold under the brand Kaiser Crystal, in Austria-Hungary and imitated the products of luxury cut lead glass. These goods were sold under the name "Imperial Crystal".

1942

The glassworks gain independence and a new name of Slovenské sklené huty, joint stock company, separation related to the establishment of the Slovak State.

1956

The introduction of the pulled stem technology in the handmade production as the first in the world (designers Hološko-Taraba).

1962

The first stage of company refurbishment performed with the aim to upgrade and extend the production of utility glass produced manually and by machines.

1974

Construction of cup-making line with 16-position shaping machine. This line was achieving almost 4 times higher work productivity than the whole plant after the first stage of refurbishment.

1979

Introduction of the first automatic line for the production of the household glassware.

1990

After the establishment of an independent Slovakia, the company as the first leaving Tatrasklo - transformation period start. Name change to Spojené sklárne, state enterprise Lednické Rovne.

1994

The glassworks launched sales under its own brand LR Crystal, later RONA Crystal and RONA now. During socialism, it was commercially incorporated under the brands Bohemia Glass and Bohemia Crystal.

1997

RONA, a.s. starts supplying glass to airlines like Qantas. Commercial centre and a showroom are created on the premises of RONA Chateau.

1998

The glass composition is changed to lead-free crystal glass - crystalline. New and the most modern automatic machine line for production of vases and bowls.

2001

The plant created the world's unique know-how by starting automatic line with so called pulled stem technology. This technology in combination with blow-blow process was for the first time in the world applied in the glassworks RONA.

2008

The unique Hot Laser Technology (HLT) was introduced on one automatic line for the treatment of the product rims. It gives extra strength at the rims, significant in HORECA business, aerospace, and ship catering markets.

2009

Modernization of hand made production by construction of 3 new cells and their connection to melting aggregate for automatic line, which keeps the company energy-efficient manual production in the future.

2016

Introduction of automatic quality inspection on automatic lines, which ensures an increase in standardization of quality for the benefit of the customer.

2018

Introduction of ultralight automatic machine made technology of stemware production, which provides quality and properties of handmade production the machine made products "Handmade by machine".

2019

RONA has launched its own e-shop for customers in Slovakia and the Czech Republic.

2022

RONA International Glass Symposium 2022 - The tradition of international glass symposia dates back to 1992. From its beginning it is associated with RONA glassworks. 130th Anniversary - 130 years of glass manufacturing, tradition, passion and success.

130
years
of innovations

One of the world leaders in
the processing of lead-free
beverage glass known as
crystalline

130 *years
of innovations*

Leading european fine crystalline producer, RONA glassworks, with strong export position, qualified personnel and the most modern technologies, celebrating its 130th anniversary. 130 years of glass manufacturing, tradition, passion and success. We are proud to have been there continuously since 1892 and we aim to keep innovating and continues to lead the charge on modern, functional glassware.

Defined by

1. Enviromental friendly

The special RONA glass composition known as crystalline does not contain lead or any other pollutants or toxins. This makes it safe for your health.

2. Design and sound

RONA glass is fragile, with unambiguous sound, as brilliant as a diamond. You will discover its beauty at first sight and your lips will taste of the essence of the glass art.

3. Improved resistance

The products are specially strengthened in places where they are particularly vulnerable. Glass is more resistant to scratches and strong impacts.

4. Brilliance and clarity

Infinite transparency without milk coating is guaranteed by the use of a rare element of the highest quality erbium used by only a few world producers.

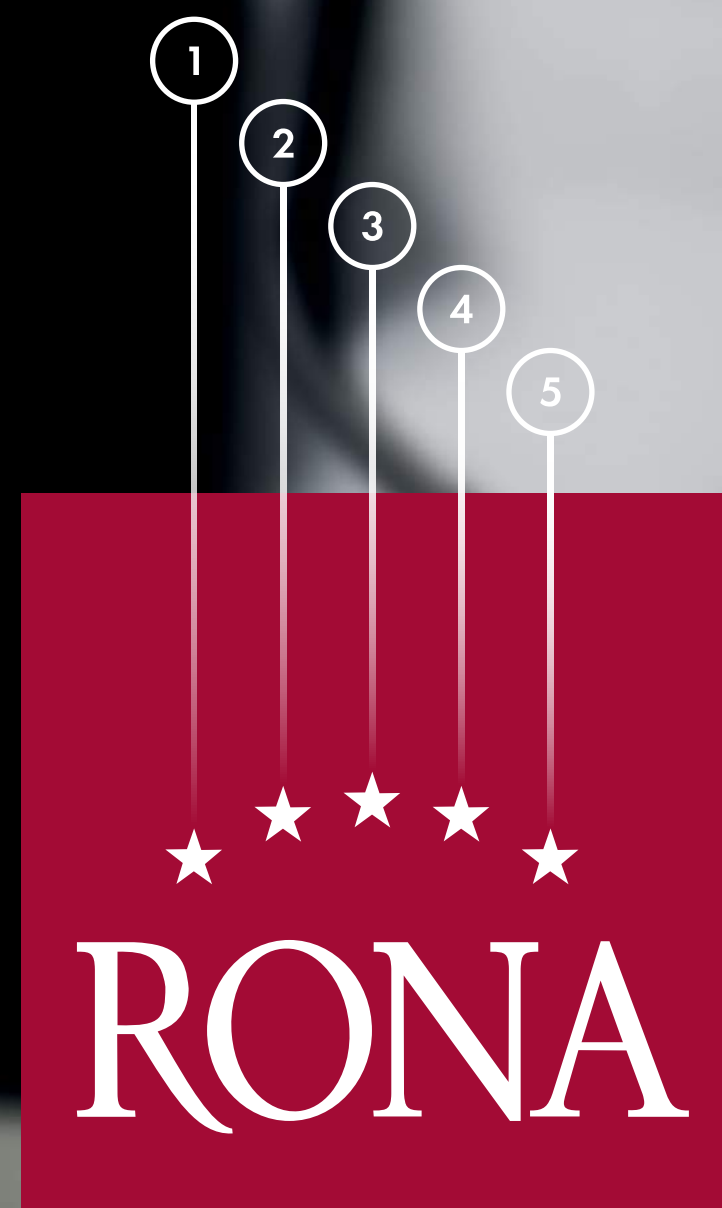

5. Dishwasher safe

The special and unique glass composition ensures 1000 cycles in the dishwashers for RONA glasses with long lasting brilliance.

RONA products and quality rank the glassworks among the world's leading manufacturers of the table top glassware.

Modern processes for glass making which simulate handmade production

Qualified staff members, right motivation and managing the demanding technologies are the basic principles of RONA success story recently. It does not concern only application of modern processes for glass making, but also regular improvements of all phases of the production processes with the aim to achieve the best execution of the finished products. At the same time RONA's production complies with the EU environmental legislation.

Machine made

Pulled stem

In 2001 RONA introduced, as the first company in the world, technology of the so called “pulled stem” into the blow - blow process.

This process creates a monolithic product from the original two – piece process. There are no weak points where stem are joined with bowls and it significantly enhances its mechanical resistance and thus durability. RONA nowadays owns automatic technology processes which simulate handmade production and create products of high quality. In addition RONA has low tooling costs for pulled stem technology and large portfolio of ready molds.

Qualified staff members, right motivation and managing the demanding technologies are the basic principles of RONA success story recently.

Our products represent an exciting combination of elegance and technology in addition to creative design, fine cold – cut rims and beautifully drawn stems that are synonymous with RONA glassware.

“
The yearly production of the company exceeds 60 million pieces.”

Lead free glass

Special glass composition known as crystalline, is free of lead, doesn't contain any polluting additives and toxins, only certified raw materials.

Decorations

Decorative techniques

Alliance of decorations and technology

Pantograph etching

The 1st factory in continental Europe where the pantograph machines were installed – back in 1896. Technique suitable for traditional, namely lacy and floral, designs. Pantograph decorations are ideal for making the glassware look fancy.

Screen printing and decals

Color screen print decorations, located on the foot or on the bowl of a stemmed glass or tumbler, are ideal for your private branded corporate gifts. Widely used for the brand application of various logos and company names. RONA can offer screen printing in a variety of colors.

Machine and hand cutting

Wide range of both machine and hand cutting capabilities. Combination of modern technologies using RONA's pulled stemware blanks along with the superior machine cutting facilities. The cuts can be either polished or grey cuts.

Diamond engraved cutting

Suitable for rich patterns and it works well for modern designs too. The range of grey cuttings includes traditional and contemporary designs. This decoration adds a lot of perceived value without costing too much.

Painting and colored spraying

Handpainting of metallic rims and bands of varying widths as per your request. A form of liquid gold or platinum is used. Hand painting with luster colors on the bowls of the stemware or barware. Large color palette available to choose from.

PACKAGING

What is the benefit?

RONA designed flexible, easy-to-pack solution that eliminates risk of product damage in transit and storage and ensure products arrive in perfect condition, every time. By switching to RONA e-commerce packaging, you avoid over-packaging which reduces weight, waste and ultimately it keeps shipping costs as low as possible. RONA e-commerce packaging will allow faster orders, optimise logistics and helping you ship in the most earth friendly, cost effective way. RONA e-commerce packaging is the best choice for your online business!
